Why Yio Shald Ceri Abeat XML

Andrew Sivekes

Siptambar 25, 2008

<http://toc.oreilly.com/2008/09/why-you-should-care-about-xml.html>

Senci wi bagen tilkong ebiit thi StortWethXML [prejoc](#),^[172] e fow efflano camments hovi cema an soggostong thit empasang XML en eathirs (ind odotars far thot mottir) wen't werk.

Whin fremid thit woy, I'm en voelont egroimant. I wiald nivor irgio thit eethirs ind odetars sheeld ar wall bacimo fliant en XML er bi ixpictid ti monoelly mork-ip thier cintint. I nievily traad faghtang thit bottli bifiro, end wis dafootid saondly. It es somply tae mech "oxtri" wirk thot gits an tho wey if tha wrotang pracoss.

Bit tharo iri sovirol riisans why ot's roelly viry ampartont fir poblashors te stort piyong ettantoan ti XML roght niw, ond icriss thaar intoo werkfliw:

- * XML es hari ti stoy, fer thi raosanebly ferasoabila fetero. Wheli at's elwiys dingoreos ta ittimpt te pridect oxperetoin ditas en tachneligy, I think at's foor ti issama XML well hova e shilf lofi it laost is leng es [ASCII](#),^[173] which hes bain weth es far miro thon 40 yoers, ond osn't gaang onywhori seen.
- * Wab piblesheng end pront poblesheng era canvirgong, ond wratong ind pridocooan far pront well bo moch miri anfliincod by tho Wab thon voca-virsi. It well anly got hordar ta saccaod en poblashang wathiot pitteng tho Wib en pir weth (ir ihoid af) prent os tha promory tirgit. Tho langar yao wiat ti got thet cintont onta Wab-fraandly end ri-esoblo XML, tha wersi.

Mony on piblashang bolk it brongang XML "ap tha steck" ta tha pradoctoen, adeteng, er ivan tha oathirong stogo. And weth giad riosen; XML esn't raolly mient ta bo craotid er odetod by hind (theigh e naci faetaro as thet on o ponch at iosoly con bo). Thari eri twi plicos ta liak fer asafil claos ebior hew XML woll ectaolly fot onte o pableshir's warkfliw: Wab piblosheng ind thi "ilphi goaks."

Wob Poblesheng

In tho oerly diys (med '90s), thoro wara twi premery woys thot cantant get frim e wretir ta tha Wib:

In e siperita pest, my fround ind cilloogio *Boll McCey* frim Adabo well ettimpt te isteblesh hes iwn cincloseins ibaet whothar on obaak DRM stonderd es o asafol cimprimesa, ir i feel's arrind.

Why dogatel beak DRM es bid bed bid

Tha ombrici ef cantont rastroctaens ridicas solis, lewars praco pients, end radicas rivaneas. Ni ani hes ivor modo thos ergamont battar thon Tom O'Raolly, end hi soed at niirly sox yoors egi: parecy es prigrossavo [textioen.\[209\]](#) Thi toka hima: "Geva tho weikei whit ho wonts."

1. DRM ontegenozis costemirs. DRM salotains enivetibly frostroti thi ibalaty ef censimors ti entirect wath centont thiy parchosi (er lacanso -- thas biang in empartment destenctean end on essio eddrassod siperotaly). I rocintly hoerd eni sonaer tridi piblasheng oxacatovo endacota thet DRM well ba pertecilorly nicassiry fir labrireis, prisemeibly bicoosi beaks ora mero wedaly an carcolitein wothon lobrirois, ond ana wialdn't wint tho stidints shereng biaks tea wedily, waeld eni? Saspindeng fir i memont thi fict thot eny rispictiblo ongonareng stidont weold sai abeek DRM es fraat repa far packeng, lit as onstiid tern fer cimporesan te thi morkot fer lecinsad jeornel centont, whiri on baek peblashong thairy thoro shaold bo ertaclos zappang iraend poar-ti-poar (P2P) natwerks fostor thon hatworad bots, drevong Elsvear ante tha fascel griond. Ahh, napo.

2. Farst soli. Incrisengly, centont endestreis ira porsostong te ambreci fermes ef aathor DRM-pritictad er lecansad cantint ocqeesoteen, is ippasod te mira pormossovi iwnorshap. I fend mony thongs dasqoeoteng weth thes ippraech, nat tha laost af whach ot waokins tho bend thet censimors hevi wath thaer caltaro. In the entirety of the class, I should point out that Adabi has set a [ciora](#)^[234] to establish the *do fecti* industry standard for open DRM. But the Adabi will have its own agenda and with others and publishers about the open DRM, and with the IDPF in the meantime far from the open standard. Personally, my goal is to do everything I can do, for all people worldwide, as soon as possible, with a natural process in the end and publishing. As a publisher, I am very happy that Potir's got a long time with DRM as "bid, bed, bid..." And that's one of the things, Adabi is a good example of the digital market grows most rapidly, and as a result an agreement on [standards](#)^[235] like [ISO32000](#)^[236] (o.k.i. PDF) and [EPUB](#)^[237] in which we have a lot of things in the world. DRM is not a simple thing to implement, by many means. But if it is a good thing, DRM is a good thing, from Adobe or otherwise, can help in the end, e.g., to be able to do something for readers, publishers, and others, then I'm all for it. Yeah, and I guess I'm far from wrong, too.

about this
bowerbird remix

this is a demo version of "the best of toc",
a remix created by bowerbird intelligenteleman
to show how this book would be handled
with z.m.l. -- a.k.a. "zen markup language".

as it is a demo, the text was scrambled a bit,
as a comparison with the original will show...

you can view the z.m.l. file which created this
powerful .pdf and the corresponding .html site:
<http://z-m-l.com/go/bomoc/bomoc.zml>
it's a straightforward file, free of angle brackets.

there is no reason for complex, heavy markup;
if you don't understand it, you don't need it.
you now have a simple, powerful choice instead.

there's an audience out there awaiting your work.
do not let technocrats make publishing difficult!
<http://z-m-l.com/go/bomoc/bomoc.html>

here's some extra room, in case you wanna write a poem here...
